About the Studies

All studies were sponsored by Herbal Hills and conducted at Vishwanand Kendra, Pune, a centre for integrative medicine and research. All were single-group (open-label) studies without a placebo group.

Level Of Evidence	Formulations
CTRI-registered clinical trial	Arthrohills Capsule
Peer-reviewed journal publication	Arthrohills Capsule, Arthrohills Oil, Keshohills Hair Oil, Femohills Capsule, Proscarehills Tablet, Keshohills Tablet
Accepted for publication	Migrahills Tablet
In-house clinical study	Trimohills Tablet

How It Works

01

Choose a formulation and read its study summary.

02

Ask for a free trial sample, the full study document and specifications.

03

Evaluate the sample and decide your brand, label and packaging.

04

Launch, subject to the applicable licences, product applications and approvals.

EVALUATE BEFORE YOU DECIDE

Study at a Glance

Clinical study on the Herbal Hills® Arthrohills Capsule formulation

Field	Study A (Registered Trial)	Study B (Published Safety Study)
Study title	An Open Label, Prospective, Multicentre, Clinical study to evaluate efficacy and safety of Arthrohills Capsules in subjects suffering from Osteoarthritis of Knee(s)	A Safety Evaluation and Tolerability of Arthohills Capsule an Ayurveda Formulation in Osteoarthritis Subjects
Registration / journal	CTRI/2017/06/008786, registered 08/06/2017	Int J Res Ayurveda Med Sci 2021; 4(1): 22–27 (ISSN 2582-2748)
Design	Open-label, prospective, single-arm; IEC approved	Observational, non-comparative, prospective; IEC approved, ICMR guidelines
Participants	33 adults with mild to moderate knee osteoarthritis	30 adults aged 40–70 with knee osteoarthritis
Dose and duration	2 capsules daily, morning, empty stomach, with lukewarm water or milk; 90 days	2 capsules (500 mg) twice a day; 21 days
Measures	VAS pain, WOMAC, time to walk 50 feet, quality of life, global evaluation, adverse events, lab tests	VAS pain, WOMAC (pain, stiffness, physical function), haematology, knee X-ray, adverse events
Sponsor	Herbal Hills (Isha Agro Developers Pvt Ltd)	Herbal Hills; conducted at Vishwanand Kendra, Pune

Composition

Each soft gel capsule contains Arthrohills Ghruta 500 mg, processed by the Siddha Ghruta method with cow ghee and cow milk and the following herbs (as published):

Ingredient	Botanical Name	Part	Quantity
Sunthee	<i>Zingiber officinale</i>	Rhizome	22.75 mg
Shallaki	<i>Boswellia serrata</i>	Gum resin	45.45 mg
Shuddha Guggul	<i>Balsamodendron mukul</i>	Gum resin	45.45 mg
Shuddha Laksha	<i>Laccifer lacca</i>	Resin	45.45 mg
Nirgundee	<i>Vitex negundo</i>	Whole plant	45.45 mg
Methi	<i>Trigonella foenum-graecum</i>	Seeds	45.45 mg
Asthishrunkhala	<i>Vitis quadrangularis</i>	Stem	45.45 mg
Maharasnadi	<i>Generic preparation</i>	—	90.90 mg
Dashmooladi	<i>Generic preparation</i>	—	90.90 mg
Chopchinee	<i>Rheum emodi</i>	Root	22.75 mg
Go Ghrit / Go Dugdha	<i>Cow ghee / cow milk</i>	—	Processing base

Key Results

Measure	Baseline	End Of Study	Change
Study A: VAS pain score (mean ± SD)	68.93 ± 15.40	31.88 ± 14.47 (day 90)	–53.7%, p<0.05
Study A: WOMAC pain score	—	—	–48.84%
Study A: WOMAC stiffness score	—	—	–53.95%
Study A: investigator global assessment	—	—	81.81% showed minimum to much improvement
Study A: needed paracetamol for pain	—	—	6.06% of participants
Study B: VAS pain score	40.28 ± 4.78	23.78 ± 2.01 (day 21)	–41.0%, p<0.001
Study B: WOMAC total	48.21	27.12	–43.7%, p<0.001
Study B: WOMAC pain sub-score	10.22	4.11	–59.8%
Study B: WOMAC stiffness sub-score	3.05	1.03	–66.2%
Study B: WOMAC physical function	34.11	21.67	–36.5%

In Study A, mean knee pain on the VAS fell steadily at every 15-day visit, from 68.93 at baseline to 31.88 at day 90. In Study B, VAS pain fell from 40.28 to 23.78 over 21 days, and every WOMAC sub-score improved significantly (p<0.001). Percentages in the table are calculated from the published means.

SAFETY
In Study B, all 30 participants completed the study, blood tests and knee X-rays at day 21 stayed within normal limits and comparable with baseline, and no adverse drug reactions were recorded. The Study A summary reports that the formulation was well tolerated and that most adverse events recorded were not related to the study product.
CONFIRM: exact adverse-event wording from the full CTRI study report

STUDY LIMITATIONS
Neither study had a placebo or comparator group, both were sponsor-funded, and sample sizes were small (30–33). Study B lasted only 21 days. The results describe what happened in these study groups and are not a guarantee of results for every user.

Private Label Availability

The Herbal Hills® Arthrohills Capsule formulation is available for private label and third party manufacturing at Herbal Hills, Lonavala. Study at a Glance

Clinical study on the Herbal Hills® Arthrohills Oil formulation

Field	Detail
Study title	To evaluate safety and efficacy of Arthrohills oil in subjects with Musculoskeletal Pain
Journal	J Ayurveda Integr Med Sci, June 2023, Vol. 8, Issue 6 (ISSN 2456-3110); DOI 10.21760/jaims.8.6.1 CONFIRM: DOI
Design	Open, prospective clinical study, single group
Participants	48 adults aged 25–65 with chronic pain of musculoskeletal origin for more than 12 weeks (low back, knee, shoulder, elbow, wrist, ankle, neck)
Use and duration	Few drops for small joints, up to 2–3 ml for large joints, once a day with gentle massage for 15 minutes; 6 weeks
Measures	Pain, tenderness, swelling, joint mobility and stiffness on graded scales (modified WOMAC); weekly visits
Conducted at / sponsor	Vishwanand Kendra, Pune (Kamalbai Hukmichand Chordia Charitable Trust); supported by Herbal Hills

Composition

Each 100 ml (as published; for external use only):

Ingredient	Botanical Name	Reference	Quantity
Nirgundi oil	<i>Vitex negundo</i>	BPN p.329	20 ml
Gandhapura oil	<i>Gaultheria fragrantissima</i>	BPN p.809	28 ml
Kapur oil	<i>Cinnamomum camphora</i>	BPN p.168	10 ml
Nilgiri oil	<i>Eucalyptus globulus</i>	BPN p.804	6.6 ml
Erand oil	<i>Ricinus communis</i>	BPN p.286	5.5 ml
Dhatura oil	<i>Datura stramonium</i>	BPN p.304	5 ml
Lemongrass oil	<i>Cymbopogon citratus</i>	BPN p.370	5 ml
Kalonji oil	<i>Nigella sativa</i>	BPN p.32	5 ml
Gandhabiroja tail	<i>Pinus longifolia</i>	BPN p.189	5 ml
Proprietary blend	Clove, cinnamon, nutmeg, tamalpatra, ajwain, sesame	BPN CONFIRM: page no. and individual quantities of each ingredient	5 ml
Til oil	<i>Sesamum indicum</i>	BPN p.639	4.9 ml

⚠ **Caution:** For external use only. Contains Dhatura (Datura stramonium), listed in Schedule E(1) of the Drugs and Cosmetics Rules. Caution: to be used under medical supervision.

Key Results

Measure	Week 1 (Mean)	Week 6 (Mean)	Change
Pain	3.73	0.42	–88.8%
Tenderness	2.77	0.00	–100%
Swelling	3.02	0.17	–94.5%
Joint mobility restriction	4.00	0.63	–84.4%
Stiffness	2.81	0.00	–100%

Every measured symptom improved week by week, and the change in each was statistically significant (p<0.05, Wilcoxon signed-rank test). By week 6, tenderness and stiffness scores had reached zero on average. The paper uses the week-1 visit as its first recorded score.

SAFETY

The authors concluded that Arthrohills Oil was safe and effective for external use in musculoskeletal pain. The publication does not list adverse-event counts.

CONFIRM: adverse-event data from the study records

STUDY LIMITATIONS

This was an open, single-group study without a control oil, funded by Herbal Hills, using graded (subjective) scores. Results describe this study group and are not a guarantee for every user. For external use only.

Private Label Availability

The Herbal Hills® Arthrohills Oil formulation is available for private label and third party manufacturing at Herbal Hills, Lonavala. Study at a Glance

Clinical study on the Herbal Hills® Keshohills Hair Oil formulation

Field	Detail
Study title	To evaluate safety and efficacy of Keshohills hair oil in subjects with mild to moderate hair fall and dandruff
Journal	J Ayurveda Integr Med Sci, June 2023, Vol. 8, Issue 6 (ISSN 2456-3110); DOI 10.21760/jaims.8.6.1 CONFIRM: DOI
Design	Open-label, single-arm clinical study
Participants	50 adults aged 18–45 enrolled; 45 completed (5 drop-outs); mild to moderate hair fall and dandruff
Use and duration	About 5 ml massaged into scalp and hair for 3–5 minutes daily and left on; mild shampoo once every 3 days; 60 days
Measures	60-second hair comb test, Adherent Scalp Flaking Score (ASFS), scalp itching, hair texture; assessed every 15 days
Conducted at / sponsor	Vishwanand Kendra, Pune (Kamalbai Hukmichand Chordia Charitable Trust); supported by Herbal Hills

Composition

Each 100 ml (as published):

Ingredient	Botanical Name	Part	Quantity
Henna	<i>Lawsonia inermis</i>	Leaf	4g
Brahmi	<i>Bacopa monnieri</i>	Leaf	4g
Aloe vera	<i>Aloe barbadensis</i>	Leaf	4g
Betel	<i>Piper betle</i>	Leaf	4g
Jaswand (hibiscus)	<i>Hibiscus rosa-sinensis</i>	Flower	2g
Methi	<i>Trigonella foenum-graecum</i>	Seed	1.25 g
Kalonji	<i>Nigella sativa</i>	Seed	1.25 g
Bhringraj	<i>Eclipta alba</i>	Whole plant	1.25 g
Amla	<i>Emblica officinalis</i>	Fruit	1.25 g
Kapoor oil	<i>Cinnamomum camphora</i>	—	1 ml
Sarso oil	<i>Brassica juncea</i>	—	0.63 ml
Coconut oil	<i>Cocos nucifera</i>	—	100 ml
Fragrance (almond)	—	—	q.s.

Key Results

Measure	Day 0 (Mean)	Day 60 (Mean)	Change
Hair fall (comb test score)	2.67 ± 0.48	1.00 ± 0.00	–62.5%
Scalp flaking (ASFS)	5.51 ± 1.71	0.18 ± 0.58	–96.8%
Scalp itching	2.31 ± 0.47	0.00	–100%
Hair texture (roughness)	2.16 ± 0.37	0.00	–100%

All four measures improved at each 15-day visit, and every change was statistically significant (p<0.05). The average comb-test score moved from the 'fair to poor' range at baseline to the 'good' range (50–100 hairs) by day 60.

SAFETY

The secondary end point was adverse effects reported by participants. Participants also gave feedback on the oil's smell.

CONFIRM: adverse-event findings from the study records — the publication does not report them explicitly

STUDY LIMITATIONS

Open-label, single-group study without a control oil, funded by Herbal Hills, with 5 of 50 participants dropping out. Hair fall was scored in bands rather than exact counts. Results are not a guarantee for every user.

Private Label Availability
